

High Performance Laminating System SPECIAL OFFER!

**Purchase a new HGSII Hot Melt Glue Spreader
& Get 20% OFF a demo/lab RP 4000-10 Roller Press!
That's a \$30,000 SAVINGS!**

HGS II HOT MELT GLUE SPREADER (NEW)

Designed to apply PUR hot melt adhesives to flat panels or surfaces using specially designed heated rollers. Ideal when laminating a wide range of dissimilar materials such as foam, aluminum, steel, plastic, gypsum board and wood.

FEATURES

- Silicone-covered spreading rollers
- Chrome-plated doctor rollers
- Cast iron roller supports
- Independent drive motors for each roller
- Variable speed forward/reverse drive from 15-85 fpm
- Electrically heated oil for each roller
- 51-inch wide

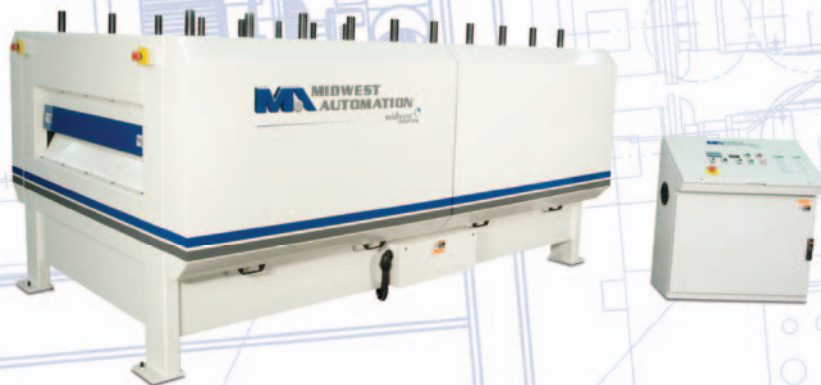

+ RP 4000-10 ROLLER PRESS (DEMO/LAB MACHINE)

Designed for optimum compression with PUR hot melt adhesives in a continuous process. The RP 4000 offers a heavy duty, fixed roller design for high pressure laminating with direct drive upper and lower rollers.

FEATURES

- Ten (10) large diameter top & bottom roller groups
- Twelve (12) individually-driven rollers
- Electronic thickness adjustment
- Electronic variable speed drive from 25-100 FPM
- Pneumatic loading system
- 53-inch wide

**Order Both Machines
&
SAVE \$30,000!**
