Model PR 2151 Pinch Roller

PR 2151 PINCH ROLLER

The PR 2151 Pinch Roller exerts continuous positive pressure on the glue line. Designed with heavy shafts and bearings to eliminate deflection or pressure variation over the length of the roller. Durable rubber coated rolls assure long and maintenance-free service.

- Heavy-duty steel frame
- Large diameter rollers
- Top and bottom rollers are resurfaced and precision ground
- Bottom roller is chain driven and pneumatically loaded
- Top roller is hand-wheel adjusted for panel thicknesses up to 4 inches
- Forward/reverse speeds from 10-40 fpm
- 51-inch wide
- Optional segmented bottom roller available on request
- New paint
