NEW CORFAB VERTICAL SPINDLE SHAPER

February 2007

One of the important new features on the new Midwest Automation Corfab models CF 1540/1545 is a vertical spindle shaping unit with 8-3/4 inch (220 mm) shaft, allowing multiple cutterheads to be stacked.

The result is significantly less setup time by eliminating the need to remove and replace the cutterhead when changing profiles. The new shaping units are raised and lowered into the proper position via a simple handwheel adjustment.

We can now offer this important new timesaving feature as a retrofit kit to existing Corfab models 1520/1530/1531.

The retrofit kit includes:

- 2 columns with dovetail slides
- 2 shaping units with 9 HP, 3600 RPM motors, and 8-3/4 inch shafts
- 4 mechanical counters (2 horizontal & 2 vertical)
- Field installation & training

For more information or to request a quotation, please contact your Midwest Parts & Service team toll-free at 1-800-697-1444 or via email at service@midwestgroupone.com.
